

PROTECTION THAT MAKES SENSE

SecureTrac offers you unparalleled asset tracking. Mobile assets such as trailers and the cargo they carry, sea going vessels, rail transport containers, tankers, agricultural equipment and plant and construction equipment, all present a host of concerns.

The integration of numerous technologies provides the most advanced and cost-effective monitoring solution for powered and unpowered assets alike.

With SecureTrac you have maximum visibility of your assets via satellite communication. This ground-breaking self-powered unit allows you to track the location and movement of your mobile asset for up to 60 months with one replaceable battery.

HOW IT WORKS

The SecureTrac transmits real-time GPS location over the Globalstar satellite system - a constellation of low earth-orbiting (LEO) satellites that relay messages to simplex ground stations.

These gateways forward data to the Globalstar Network and then to the internet, giving you and your customers the ability to monitor location and manage the fleet, through any internet-enabled computer.

ADVANCED MOBILE ASSET TRACKING

BENEFITS OF THE SECURETRAC

- Device is delivered complete and ready to go;
- Long-life battery - up to 6 years battery operational life;
- Reduce theft and speed asset recovery;
- Least cost asset tracking solution: High ROI;
- Wireless installation;
- Configurable programming;
- Motion sensor for geo-fence alerts;
- Enhanced customer service and confidence;
- Reduced insurance premiums;
- Single Global Network - no roaming charges.

MONITOR YOUR MOBILE ASSETS WITH SECURETRAC

WHY SECURETRAC IS THE RIGHT CHOICE

Easily installed without any wiring: "Plug and play" right out of the box;

Configurable Programming: Flexible messaging and alarm settings programmed by wireless connection for tailored reporting;

Motion alerts, start/stop locations;

Certified to SAE and Military Standards: reliability in extreme conditions;

Superior jam resistance: Cannot be easily jammed, spoofed or intercepted;

Reliable Global Network: No issues with cell coverage and no roaming charges.

ADVANCED WIRELESS ASSET MONITORING

OPTIONS / ACCESSORIES

SECURETRAC PROTECTION COVER

The SecureTrac protective cover provides extra assurance in heavy industrial environments.

It can withstand direct strikes. Made from a rubberized velocity compound. Colour and shape are customisable.

INTERESTED IN A TRIAL?

SecureSeal Systems' products provide an array of benefits that streamline supply chain management and directly affect your overall business operations and bottom line. Knowing where your cargo is at any given moment provides you with peace of mind and instills confidence in your partners. If you are interested in running a trial of SecureTrac, give us a call.
