

PROTECTION THAT MAKES SENSE

SecureSeal offers you unsurpassed trailer security, eradicates disposable seal debris from your yard, and saves you money.

When calculated over the life of the product or trailer, SecureSeal is the lowest cost reusable seal on the market. It has over 15 years of proven reliability in the most hostile environments.

The SecureSeal comes with a three-year warranty, but you can expect it to operate beyond the mechanism guarantee of 50,000 operations. In other words, a SecureSeal offers security for the lifetime of your trailer.

HOW IT WORKS

The SecureSeal is permanently fixed to the door with four studs accessible only from inside the vehicle. When the doors are closed, a stainless steel cable is looped through the door locking mechanism and the SecureSeal then generates a random five-digit security code. The SecureSeal Data version also generates a unique covert security seal number.

The recorded security code ensures against unauthorised access: when the seal is opened, the security code is scrambled and rendered unreadable until such time as the seal is reclosed - at which point a new random five-digit code is generated.

The SecureSeal is approved for both roller shutter and barn doors, as well as curtain-sided vehicles, on which an extended length cable is utilised.

ADVANCED CARGO SECURITY

BENEFITS OF THE SECURESEAL

- Advanced Security: random number security code in a tamper-evident mechanism;
- Excellent ROI: price for seal as low as 1.4p per sealing;
- Environmentally Friendly: no more scrap seals and unit is fully recyclable;
- Proven Reliability: backed up by a three-year warranty. Trusted by the world's largest fleets;
- Cost Effective: eliminates the hidden costs of disposable and electronic seals;
- Quick and easy to install.

SecureSeal is the Green Choice.

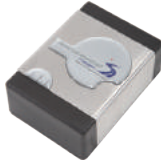

By using a SecureSeal instead of disposable seals you will not only save money, but eliminate the debris associated with disposable seals. And after its long life is over, the SecureSeal is 100% recyclable.

PROTECT YOUR CARGO WITH SECURESEAL®

OPTIONS / ACCESSORIES

SECURESEAL LOGGER

The SecureSeal Logger enables loss prevention professionals to investigate seal activity over an extended period of time. The Logger memory downloads to a drive-by receiver to the Internet portal to provide a searchable audit trail of date and time activity over several months.

SEAL RF

Seal RF is the latest innovation from SecureSeal Systems. It offers advanced wireless self-powered seal monitoring. The Seal RF unit detects SecureSeal security seal openings and closings and sends a wireless data message to the vehicle's telematics or gatehouse check system.

The data message contains the trailer identification, a covert seal number and alert for open or closed seal conditions.

SECURELOC

Where a barrier seal is required, the Secureloc version is the perfect answer: Secureloc contains all the security features of the SecureSeal but may only be opened with a dedicated key. It's the ideal alternative to using a padlock.

TAMPER-EVIDENT REUSABLE SEAL

TECHNICAL SPECIFICATIONS

The housing is formed from AISI 316 grade British stainless steel, resistant to salt mist. The housing encloses the random number generator to IPX 6 - resists water ingress under pressure - and conforms to BSEN 60529.

The housing meets Ministry of Defence standard 07-55DI.

The seal mechanism has an operating temperature range of -40°C to +85°C and is approved to IEC 68 to withstand:

• Dry Heat	IEC 68-2-2	85°C for 16 hours
• Cold	IEC 68-2-1	-40°C for 16 hours
• Damp Heat	IEC 68-2-28	Condensation test
• Bump	IEC 68-2-29	40g's for 6m/second
• Vibration	IEC 68-2-36	3Hz-500Hz

SecureSeal is the Green Choice.

By using a SecureSeal instead of disposable seals you will not only save money, but eliminate the debris associated with disposable seals. And after its long life is over, the SecureSeal is 100% recyclable.
